High-tech future on the way for Good Shepherd students

2010 is shaping up to be a big year for all involved with Good Shepherd Lutheran College in Noosaville. Students in Year 6, 9 and 10 have started the new year with a high-tech helper in the form of a lap top computer to be used in their classes and for homework for the duration of their schooling.

Principal John Mason said the lap tops were the schools way of expanding a Federal Government technology program to ultimately see every Good Shepherd student from Year 6 upwards studying with their own lap top.

This year the school is also on the pre-approval list for registration as a certified member of the Geneva-based International Baccalaureate education program (see www.ibo.org).

The program involves a multi-disciplinary approach to curriculum formation aimed at providing students with an international level of education.

The school’s aim is to be fully accredited in the use of the program by 2012.

Other items on the agenda include the impending completion of the Little Lambs Early Learning Centre offering long and short day care for children aged 3.5 years and over, and the completion of a new library resource centre, expected by Term 3. Little Lambs is available to all local residents, not just school families.

The school has also opened its scholarships program offering 50 per cent tuition fee discounts for Years 6, 9 and 11. Application forms and further details are available online at www.gslc.qld.edu.au.
